Subject: RE: GK - As-built information and dwgs

Steve - Elliott, Dave G and I will develop a list of the needed items to accomplish this. Given the gaps in the existing information and possibly needing a considerable amount of data from ERRS/Piping Contractor, completing this by mid-next week is problematic.

Dave

Subject: GK - As-built information and dwgs

Elliott and Dave,

As clarification to the request for As-build dwgs for the Gladstone Pond / Piping System and other systems at the site, we need to have spatial and basic components identified. We do not need details of all construction elements (except some specific locations) -- trenches, bedding, fill, etc. are not necessary in all areas. Locations of all valves, approximate depths of piping, critical elevations, and any road and creek crossings (accurate and detailed).

Information on materials and specifications provided and installed by other contractors (piping, liner and other) shall be provided by those vendors / contractors - ERRS (ER, LLC) shall provide those materials to EPA and START engineer. This shall also be appended to the START final report.

If you have questions please let me or Craig Myers know.

Steve
